RE-MOV SILICONE & ADHESIVE REMOVER

Re-Mov is specially formulated to “break the bond” between silicones and surfaces.

Most adhesives simply dissolve and wipe away in one step.

Re-Mov makes the job quicker and safer and is especially effective on those “impossible adhesives” yet can be used on most finishes or delicate surfaces without the risk of damage.

Re-Mov is safe to use on metals, tools, glass, mirrors, wood, floors, cabinets, fiberglass, plexiglas, polycarbonates, most plastics, carpets, clothing, fabrics, vinyl, upholstery, varnished or painted surfaces, stone, marble, tiles, ceramics and enamel and porcelain surfaces.

Re-Mov can be used to remove silicone, caulk, adhesives, gaskets, lubricants, polyurethane adhesives, glue residue from tapes, labels, stickers, etc.

Re-Mov can also be used to remove gum from carpets, enamel spray paint from concrete, brick and metal surfaces, and completely removes silicone residue from glass and plexiglas surfaces.
